Elements LED In-Wall: Water

MODEL # 10675

Envisioned as a way-finding marker or illuminated art piece, these 3' or 4' tall linear lighting fixtures are recessed into the wall. On the surface of the wall, only a minimal frame is visible, but inside the wall light flows forth. The steel outer frame comes primed for painting to match any interior. At the back of the channel is a plate made of a mirrored panel with clear half-spheres resembling water drops which is covered with a two-way mirror creating an infinity effect. Around the sides of the channel is a strip of LEDs which radiates bright, warm, ambient light. Dim for romance, brighten for impact. Designed by Doyle Crosby.

MATERIALS

Aluminum, Steel

FINISHES

White Primer

LAMPING

36" nominal: 36.625" (930 mm) LED at 40w, 2700 K, 90+ CRI. Fixture can be dimmed using 0-10v low-voltage 4-wire dimming controls and wiring. Other systems to be quoted.
