

#### Lamping Specifications

Incandescent: Candelabra base,  
One, A-15, 60w max each  
(Ceiling fan lamp)

#### IMPORTANT | CAUTION

Read all instructions thoroughly, and  
turn off power at circuit breaker or fuse  
box before proceeding.

Step 1 Remove fixture and all components from packaging. Avoid using a sharp blade as doing so may result in damage to the finish on the fixture and/or linen shade.

Step 2 Secure mounting bracket to outlet box using screws provided in mounting kit. (See Figure 1)

Figure 1

Step 3 After turning off power at the circuit breaker/fuse box, make wire connections using twist-on connectors provided in mounting kit: Connect the black fixture wire to the hot supply wire; typically black. Connect the white fixture wire to the neutral supply wire; typically white. Connect the fixture ground wire to the ground supply wire; typically copper or green.

Step 4 Push all wire connections inside the outlet box, then secure fixture to mounting bracket using the allen wrench provided in the mounting kit. Be sure that the fixture is flush against the wall while tightening the set screws. (See Figure 2)

Figure 2

Step 5 Attach the acrylic diffuser, frosted side down, to the bottom of fixture arm using the bottom finial. (See Figure 3)

Step 6 Install the shade harp. (See Figure 4)

Step 7 Install appropriate lamp, taking care not to exceed the recommended wattage on relamp label.

Step 8 Install the perforated diffuser onto the shade harp (See Figure 5), then carefully lower the shade into place, and secure with the top finial.
