The initial concept for the Spire Series was born on a daily walk by a church spire in Jake's neighborhood. To soften the shade, inspiration was found within different forms and patterns in nature.

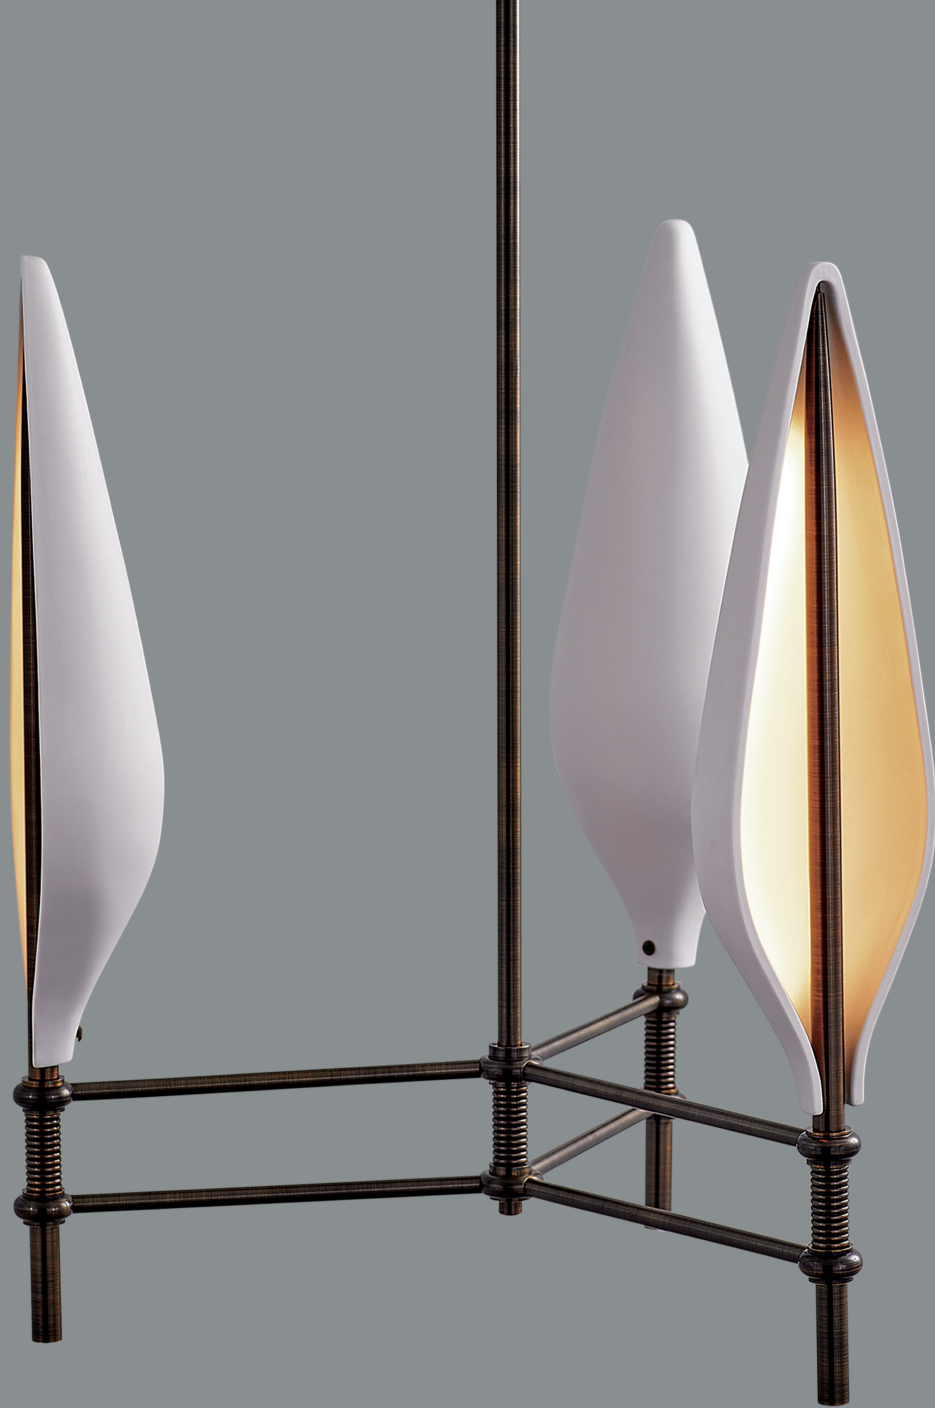

The architectural details of the church spire and the soft notes of organic nature are evident throughout the different fixtures in this series.

Spire Sconce shown in blackened brass,
black painted porcelain and gold leaf

Spire Pendant 3 shown in antiqued brass, porcelain.
The turned brass details highlight the precision
of our Colorado-based artisans.

MATERIAL STUDY - PORCELAIN

The initial concept was for a cast metal shade, but in an effort to soften the form and push the materiality of the piece, we sourced bisque porcelain to create a soft, warm glow.

The Spire Leaf Pendant (Falling Leaves) brings a sense of metaphoric movement and poetry as if the porcelain leaves themselves are drifting towards the ground. Custom arrays are available upon request.

DESIGNER NOTES - JAKE OLIVEIRA

The interplay of materials; robust milled brass & delicate porcelain evokes the balance and harmony present in the natural world and is highlighted throughout the series.

The Spire Leaf Pendant 9
is a beautiful focal piece and can be used
to create large systems in grand spaces.

Story of Duet: A conversation between Jake and Schuyler about the presence of absence led to a form study wherein Jake conceptualized a fixture that splits one form into two elements to create a reveal. Both sides exist in concert, creating beauty in the empty space that rests between them.

and clear rippled art glass

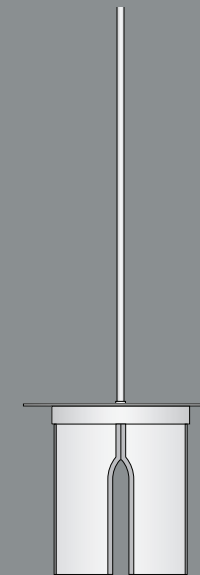

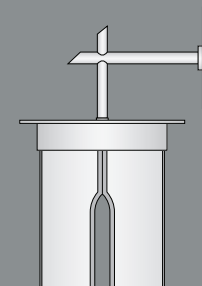

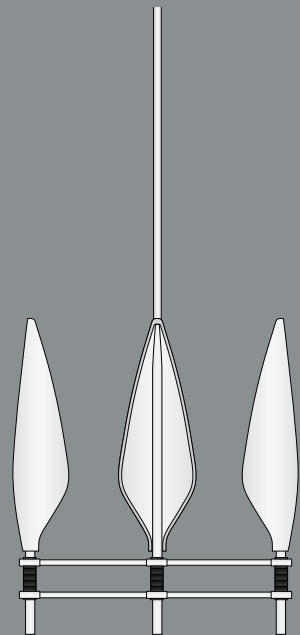

DESIGNER NOTES - JAKE OLIVEIRA

"I am inspired by natural splits, the tuning fork as a sculptural object, and architectural voids. I focused on adding a flare of personality to these minimal forms, carrying through the core idea of splitting shapes."

DESIGNER JAKE OLIVEIRA

"I started collaborating with Schuyler Sweet and the Boyd Lighting team in 2019 as they approached their 100th anniversary. You don't reach a centennial year as a business by remaining stagnant. Boyd put complete trust in my process and design intent from the get-go. The team's passion and eagerness to re-imagine what lighting can be in 2022 and the future leaves me inspired to see what we can bring to life next.

Being a part of Boyd shaping the next century to come is an immense honor."
