## THE ISA PENDANT

All projects are unique and some of them require custom solutions.  
All vaulted ceilings are not created equal, but if we know the slope,  
we can provide a fixture that hangs perfectly level.

The following slides contain more examples  
of modified Isa Pendants and other standard versions of Boyd fixtures.

## THE ISA PENDANT

Modification needed:

- Lengthen the original design to 94" for a residential project

## THE ISA PENDANT

Modification needed:

- Beam on the ceiling that is unavoidable.
- Canopy re-engineered and split to allow for the beam

## THE GHOST PENDANT

Modification needed:

- Remote Drivers
- Cables straight into ceiling

## THE GHOST PENDANT

Modification needed:

- Larger 60" diameter for a residential project

## THE COSMO PENDANT

Modification needed:

- Longer over all height
- Custom Chain

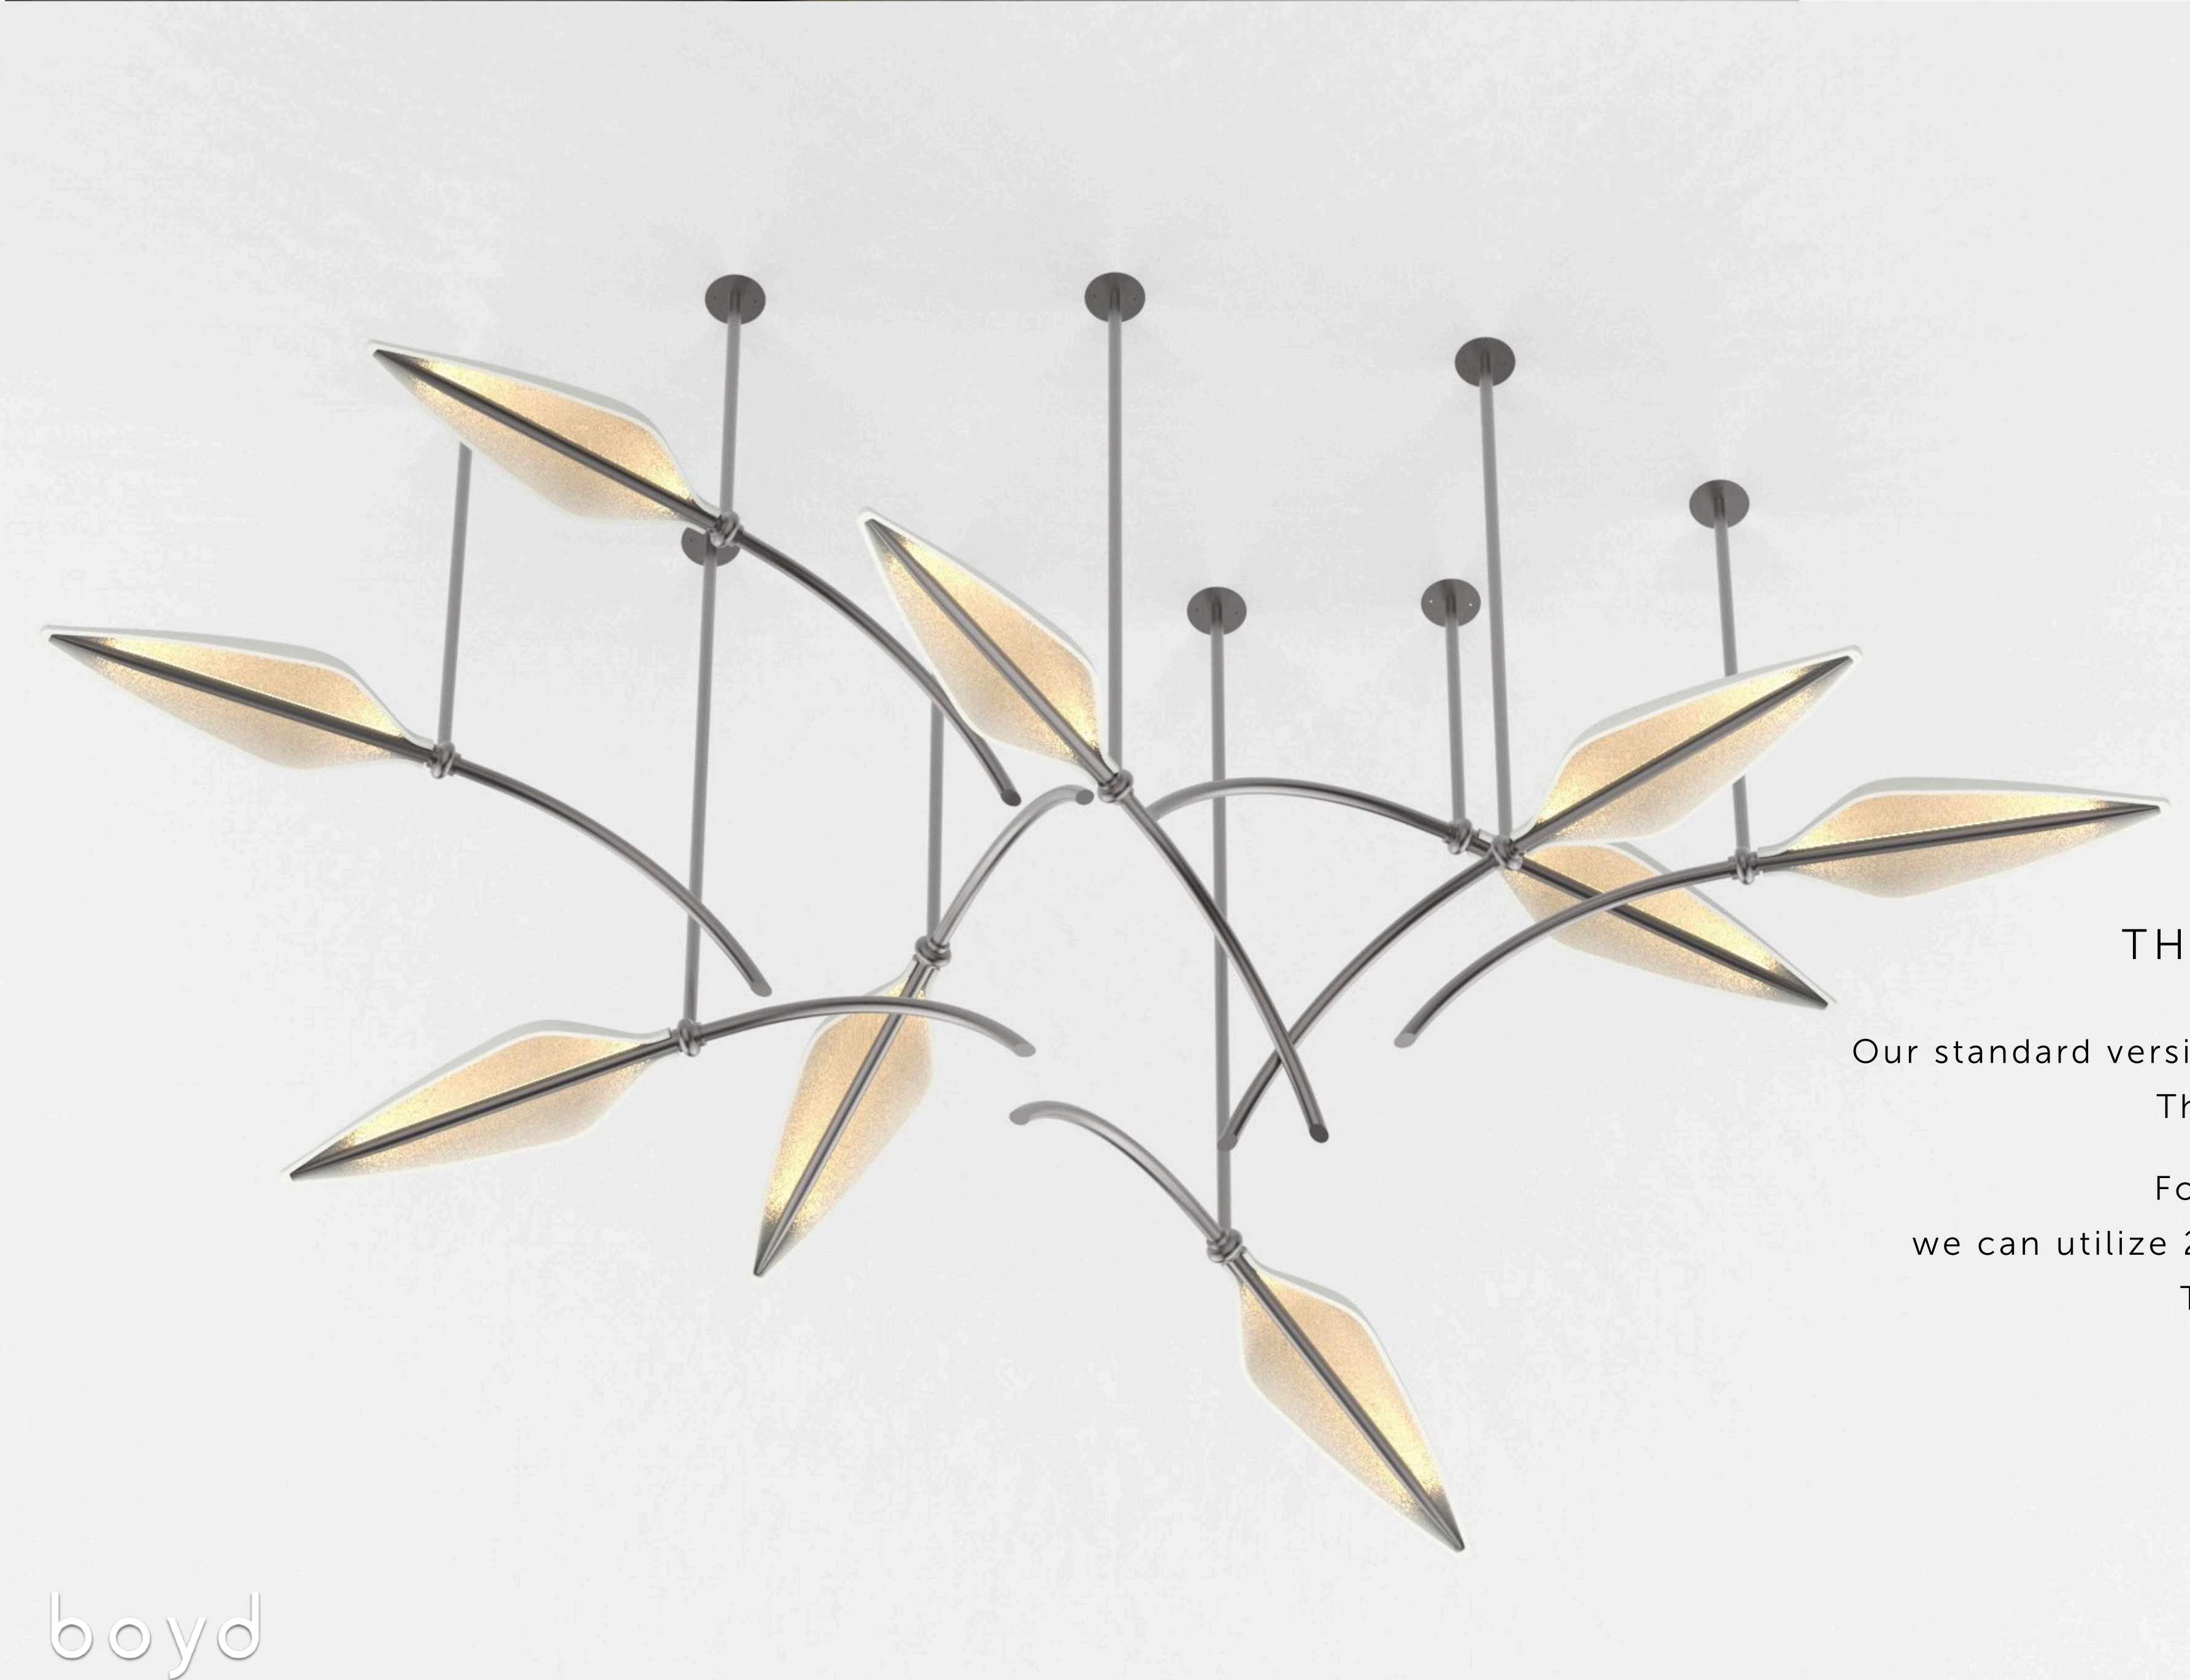

## THE ICICLE DISK

Modification needed:

- Large 54" diameter
- Longer Overall Height
- Additional drops

## THE SPIRE LEAF PENDANT 9

Our standard version has a decorative canopy with integral drivers.  
This may not work for all projects.

For a more architectural aesthetic,  
we can utilize 2" medallions that go straight into the ceiling.  
This will require remote drivers.

## THE SPIRE LEAF PENDANT 18

Modification needed:

- Unique configurations of individual pendants in space
- 2" low voltage canopy design (remote driver required)
- Eliminating the full canopy

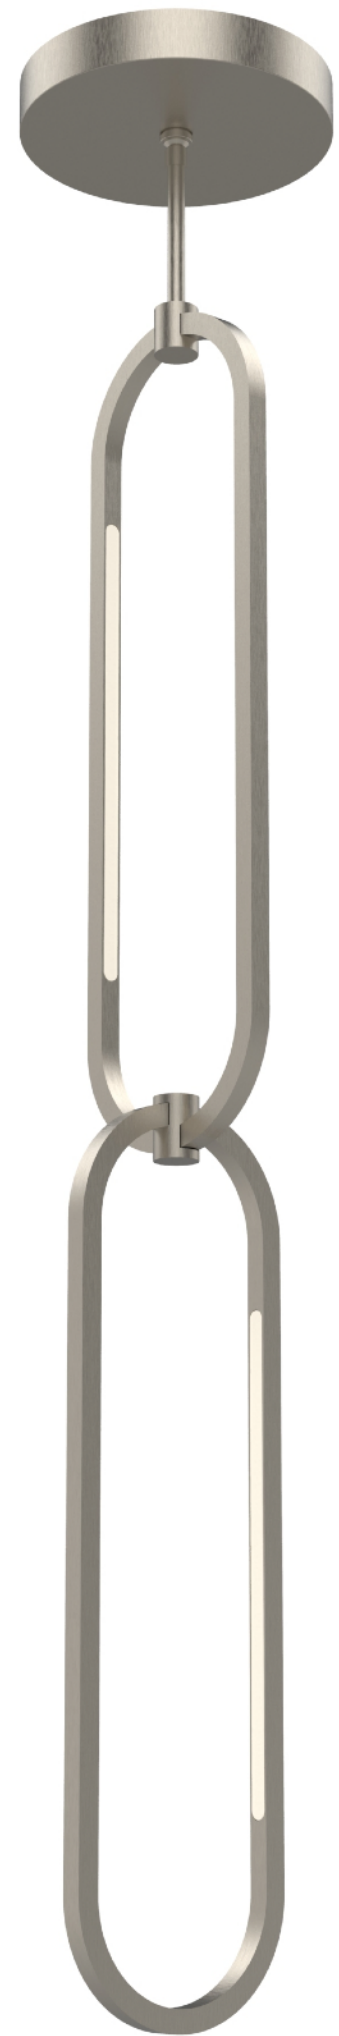

## THE MIAMI SCONCE

Modification needed:

- Longer Backplate

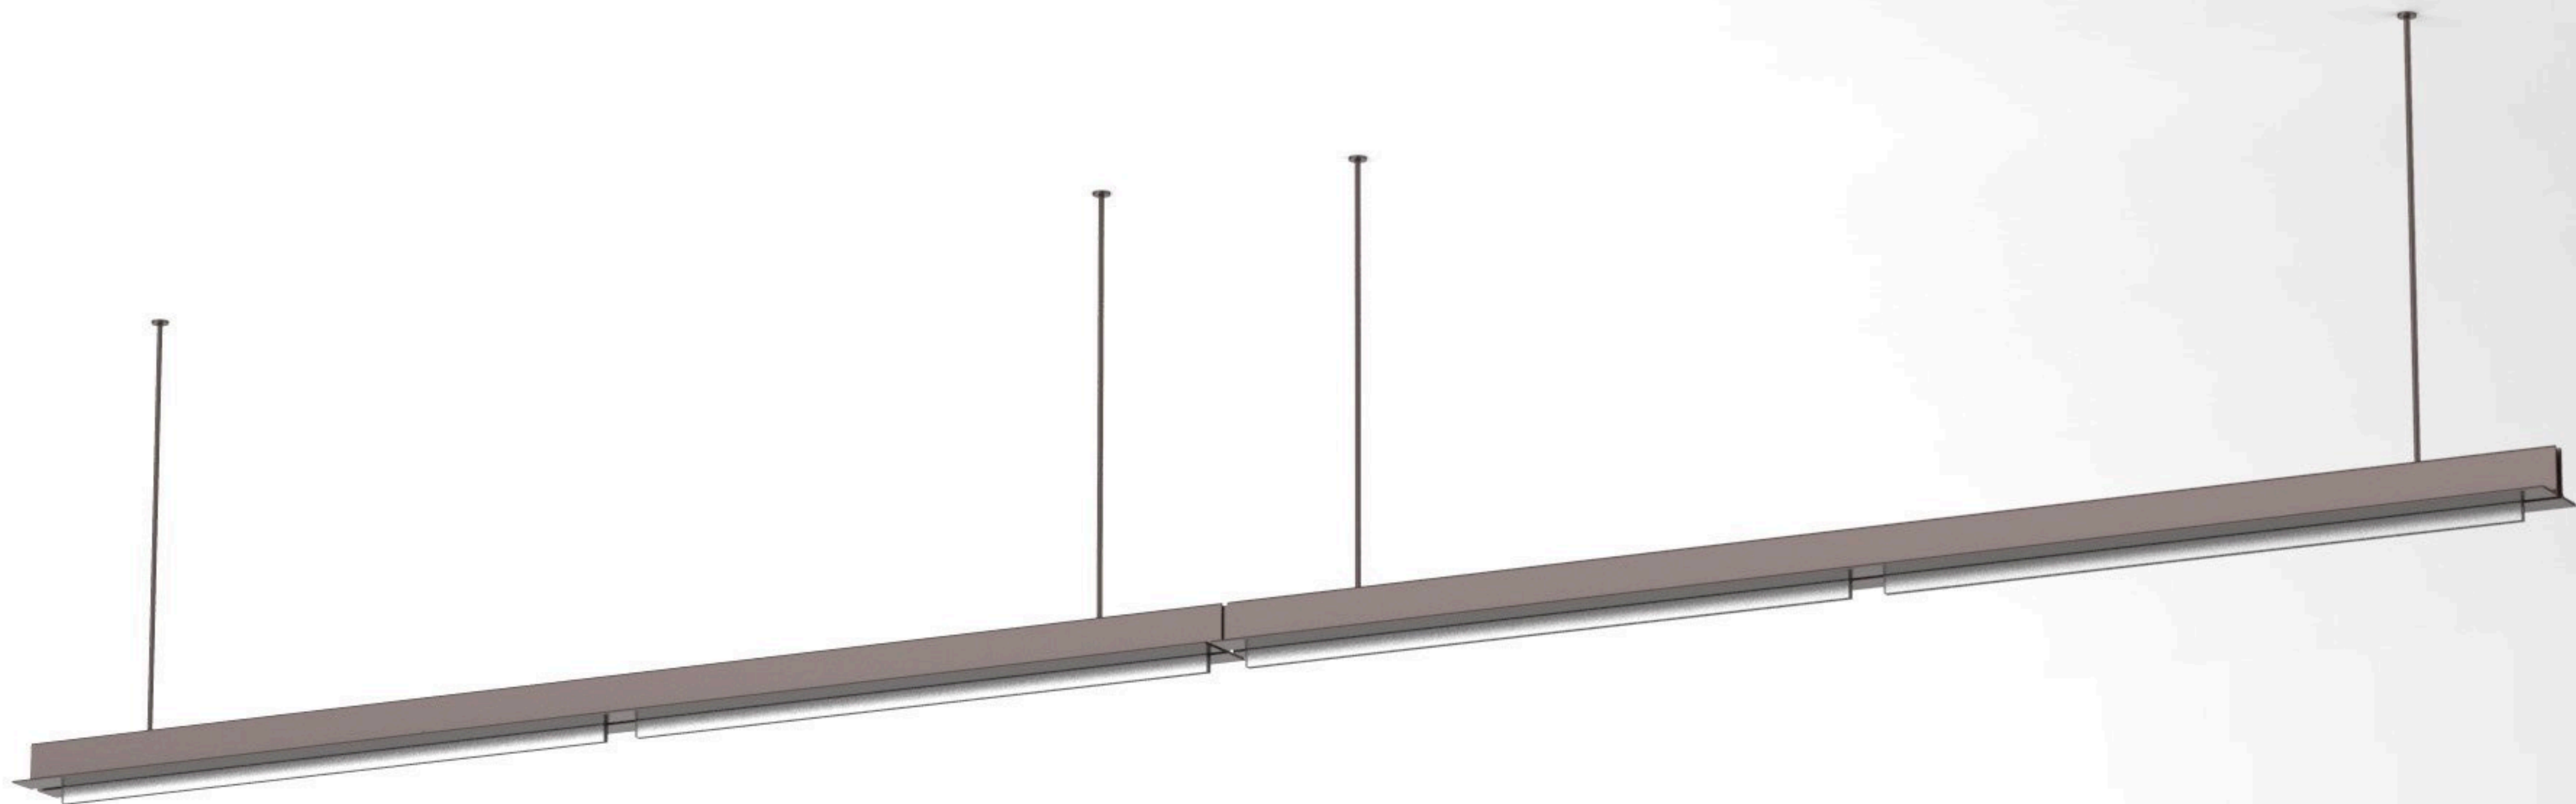

## OVALOCHAIN SERIES

Modifications needed:

- Myriad of different configurations
- Quantity and size of links customizable
- Long Overall Heights achievable

## THE T-LIGHT PENDANT

Modification needed:

- Extended length of 19'
- Multiple pieces of glass

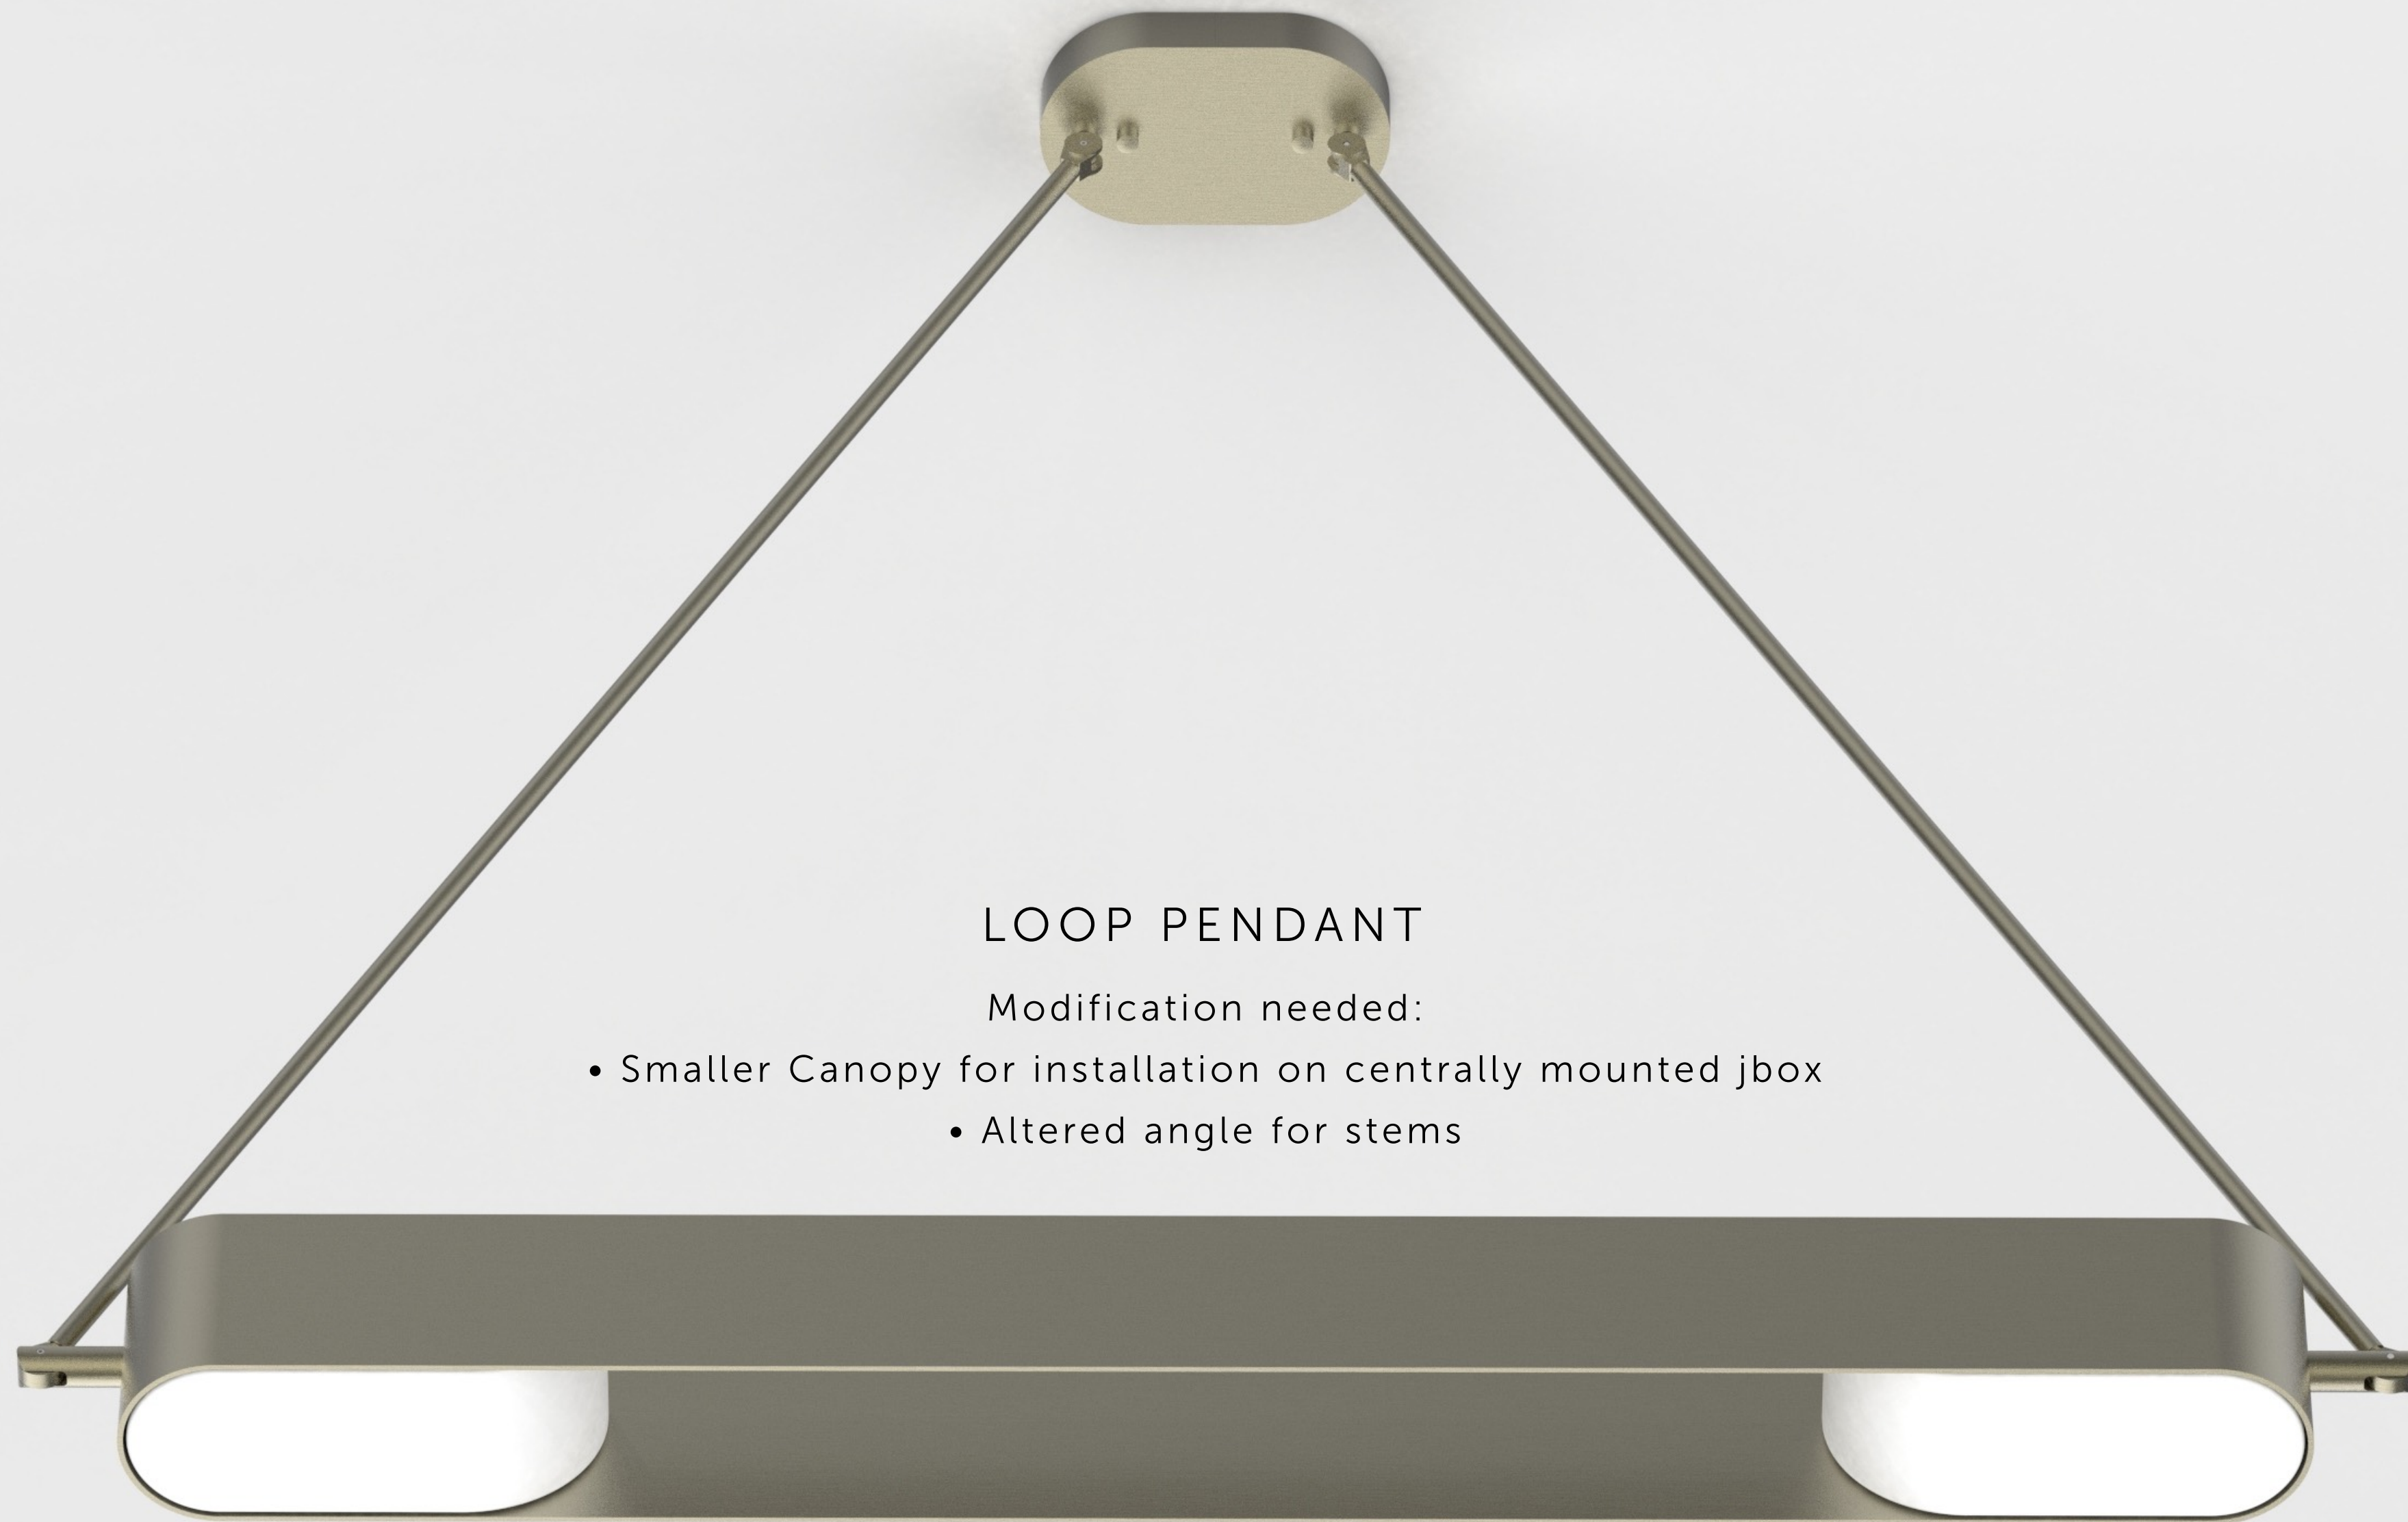

## LOOP PENDANT

Modification needed:

- Longer length at 107" for a restaurant in Paris
- Full indirect and direct illumination

## LOOP PENDANT

Modification needed:

- Smaller Canopy for installation on centrally mounted jbox
- Altered angle for stems

## THE NUMI ROUND PENDANT

Modification needed:

- Incorporated a direct downlight into existing design
- Modified the standard indirect uplight

## BRANCH PENDANT

Modification needed:

- 10' Length

## THE PLATEAU SCONCE

Modification needed:

- Illuminated signage for resort hotel room numbers

## THE ASPEN PENDANT

Modification needed:

- Longer height overall
- Larger size of drum
- Full length textured cast brass detail

## ICICLE PLANE

Modification needed:

- (22) 2' x 8' sections
- Featuring additional illuminated drops

## THE CASCADE LUMINAIRE

Modification needed:

- Larger size
- Additional Drops
- Altered canopy
