STEALTH PENDANT

The Stealth Pendant is milled to create a geometric aluminum form while providing evenly distributed performance illumination. It is ideal for kitchen islands, bars, dining tables, conference tables, and contemporary interior settings.

LUCIA PENDANT

The Lucia Pendant is a minimal profile crafted in architectural bronze and features the ability to rotate the illuminated section down to create task lighting or rotated up for softer indirect illumination.

BRANCH PENDANT

The Branch Pendant features a linear pendant on two different planes, providing direct illumination from within a small 5/8" brass tube. This fixture can be modified to achieve longer lengths with multiple stems.

BLADE PENDANT

The Blade Pendant is a sleek and minimalist design that provides wrap around illumination available on one or two different circuits. The soft round form on the end draws the eye to the beveled metal interior, creating a unique and subtle linear fixture.

LINEAR

A BOYD linear pendant is far more than a standard fixture—it embodies a rigorous design philosophy to which we hold ourselves accountable.

We challenge ourselves to apply the same uncompromising design principles to the linear form as we do to every other piece. The goal? To shape style, finish, and detail with precision, placing emphasis exactly where it matters most.

The result is a distinctive BOYD design language that stands apart—pure, elegant, timeless, and subtly bold. The Stealth, Lucia, Branch, and Blade Pendants exemplify this approach, each with its own unique character, yet unmistakably BOYD.

Our linear products are engineered for performance and can be customized in countless ways. We invite you to engage in a dialogue with us to tailor our designs to perfectly suit your space.
